

# Interest of Big Data to assess the quality of the grapes

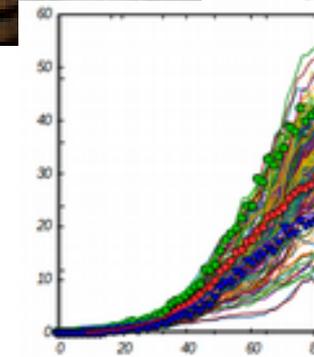

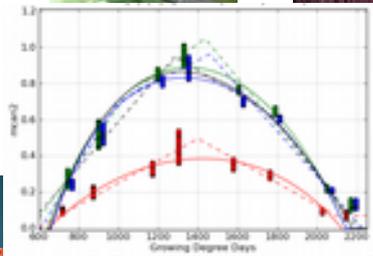

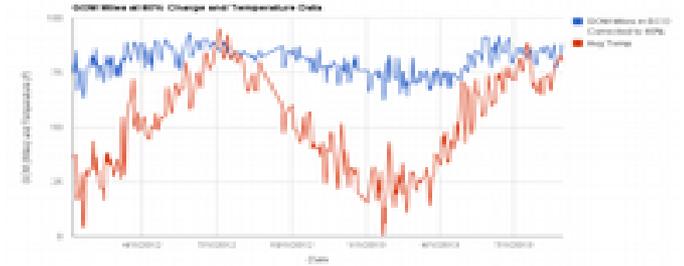

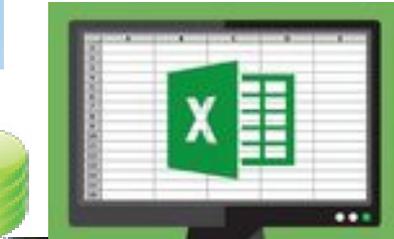

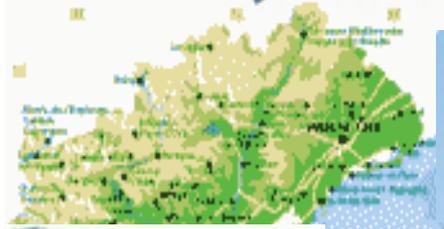

**Pascal Neveu INRA Montpellier**

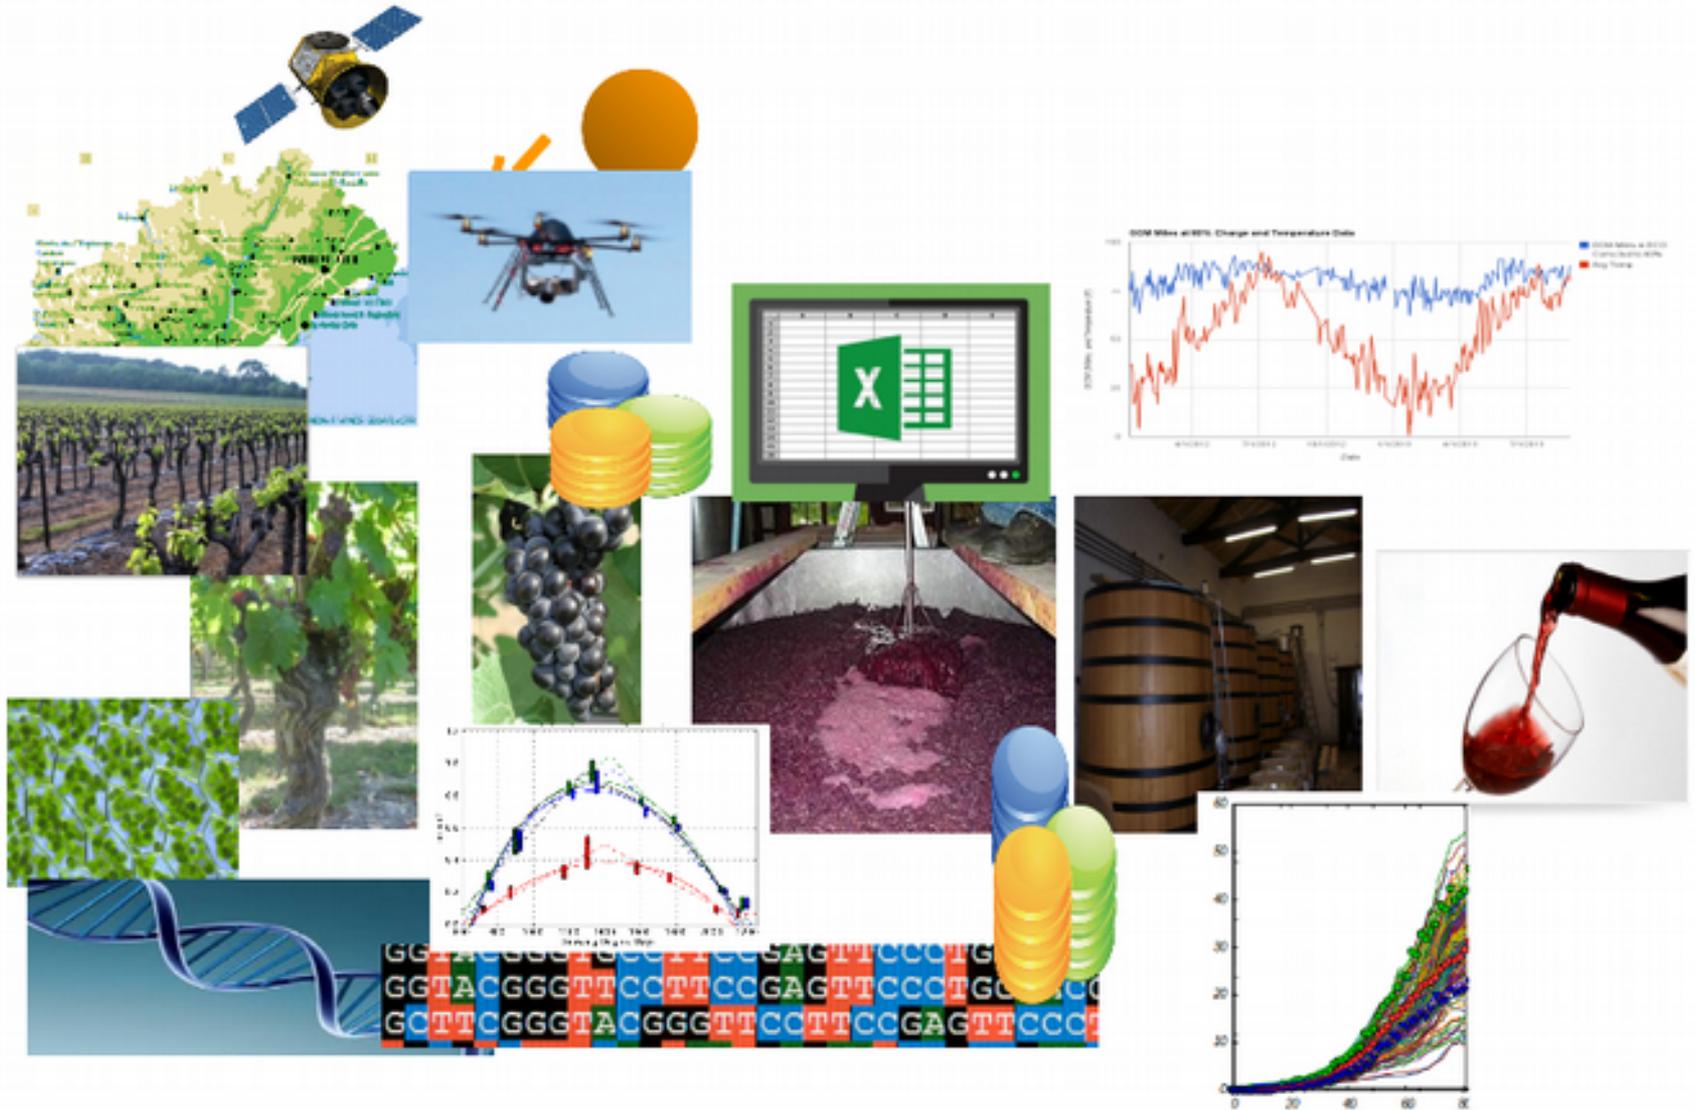

# Grape quality?

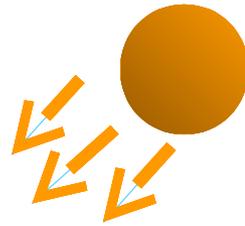

# Heterogeneous data!

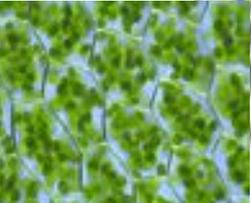

# Data must be grouped!

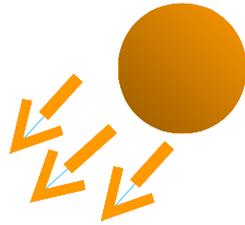

# Data integration

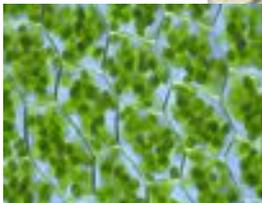

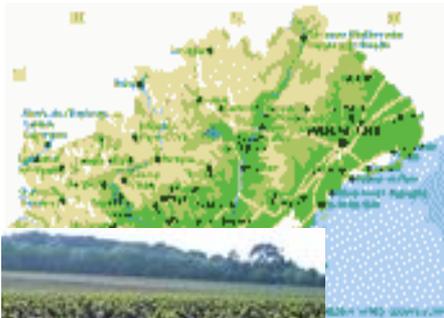

**link, associate, group, complete, combine, mix, etc**

# Data integration

**link, associate, group, complete, combine, mix, etc**

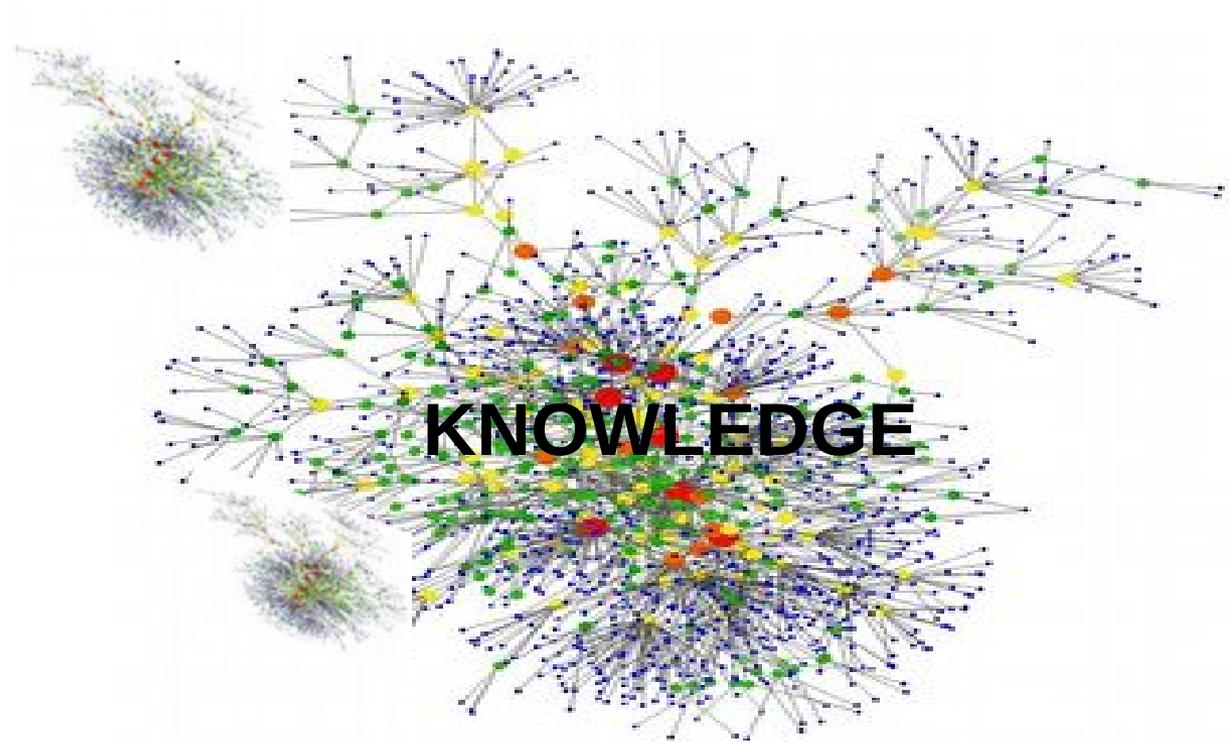

# The rise of Big Data in agriculture

More and more data services and datasets on Web

- Wine data
- Viticulture data
- Weather data
- Soil data
- Environmental data
- Genomic data
- Economic, health etc.

# The rise of Big Data in agriculture

# Agriculture Big Data

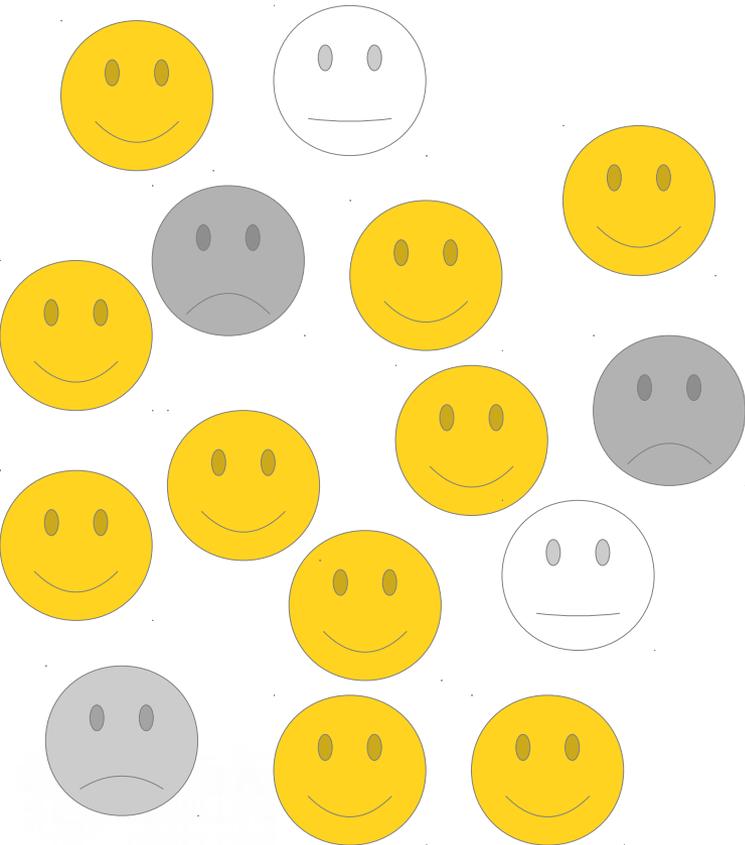

## V characteristics

- **Volume:** massive data and **growing size**  
→ *hard to store, manage and analyze*
- **Variety and Complexity:** different sources, scales, disciplines  
different semantics, schemas and formats etc.  
→ hard to understand, combine, integrate
- **Velocity:** speed of data generation  
→ have to be processed on line
- **Veracity, Validity, Vocabulary,** Vulnerability, Volatility,  
Visibility, Visualisation, Vagueness, etc.

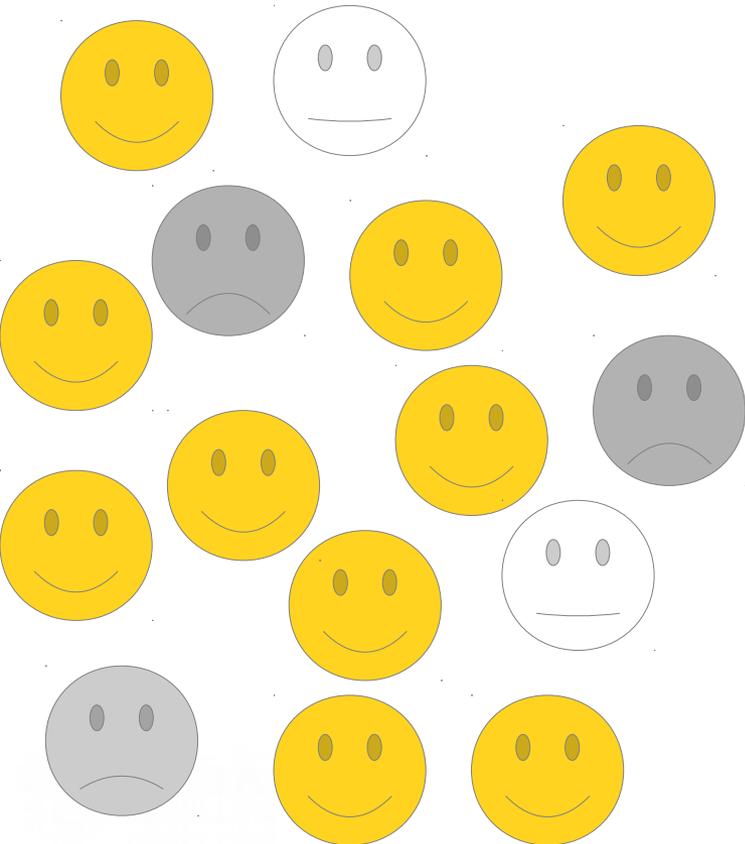

# Why Big Data is important for Agriculture?

**Population  
understanding / treatment**

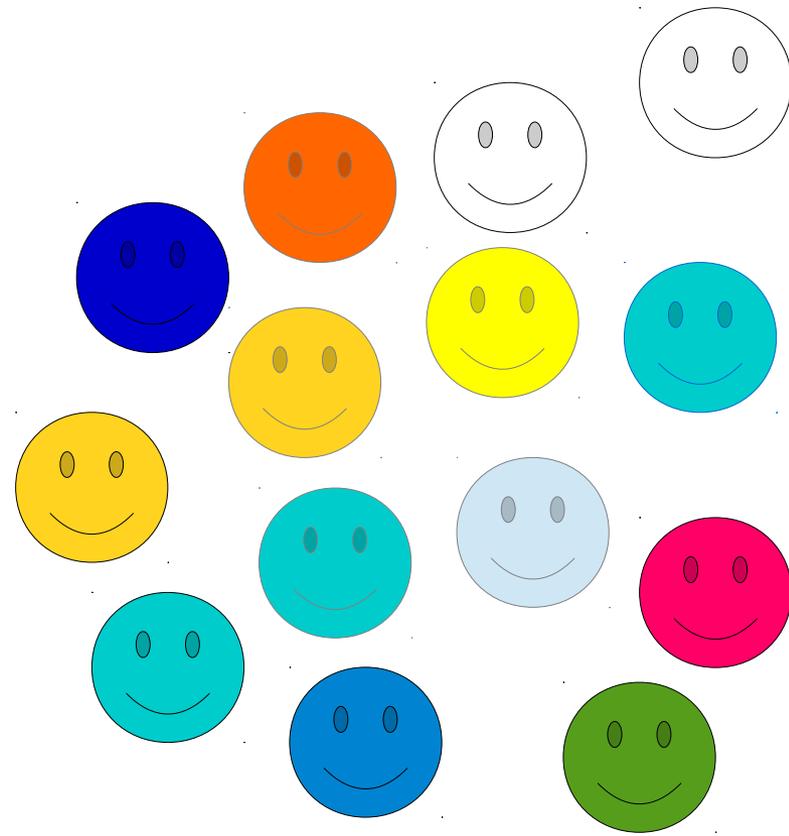

# Why Big Data is important for Agriculture?

**Population  
understanding / treatment**

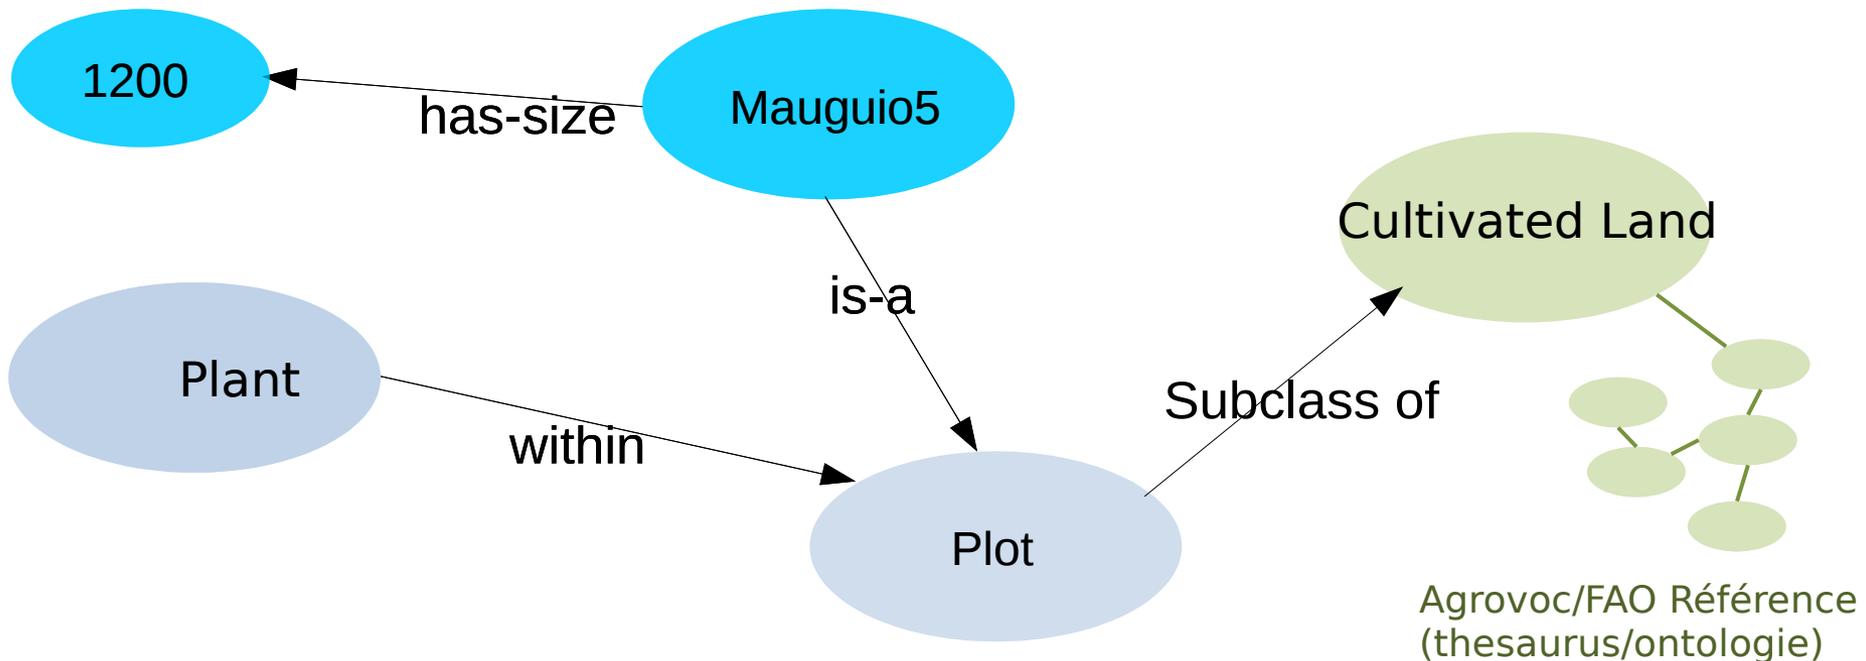

**Individualized  
understanding / treatment**

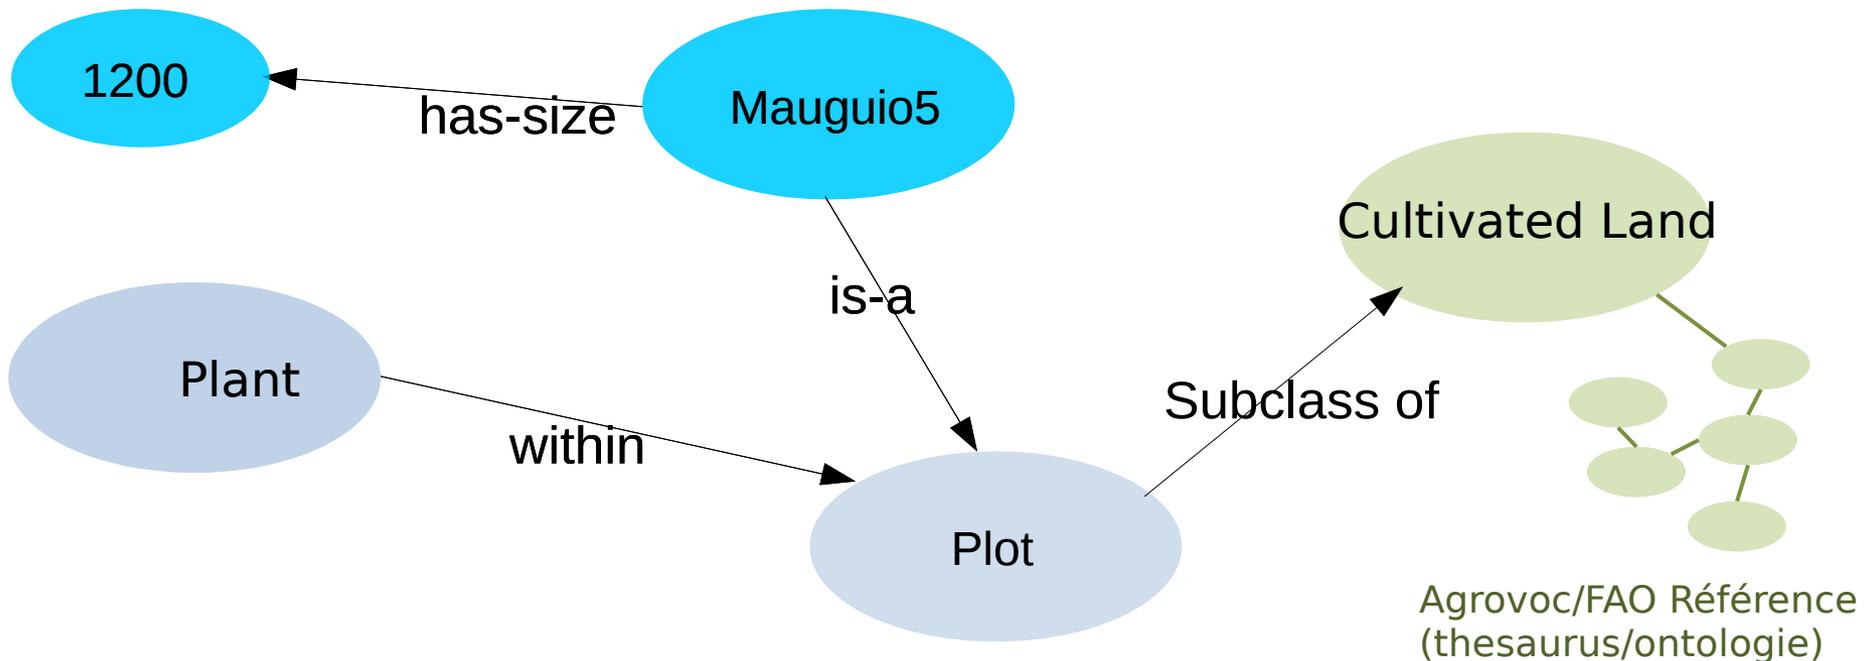

# Structuring Data

*Metadata / Ontologies provide the meaning of the data*  
→ link each data element to a **controlled, shared vocabulary**

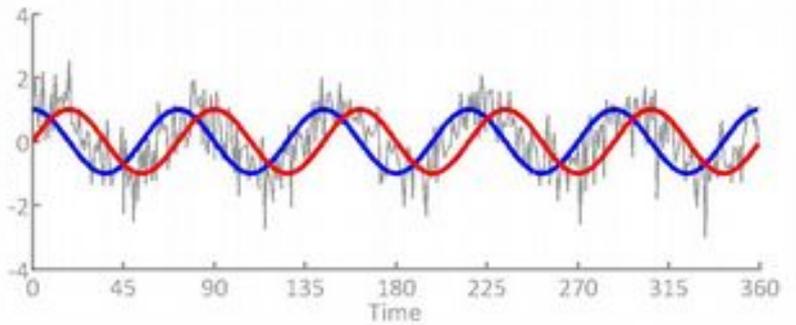

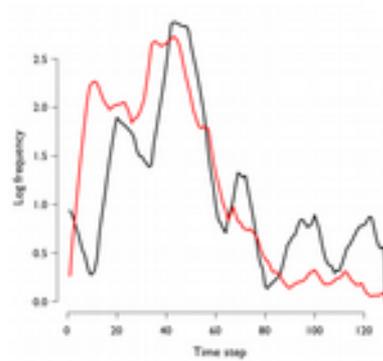

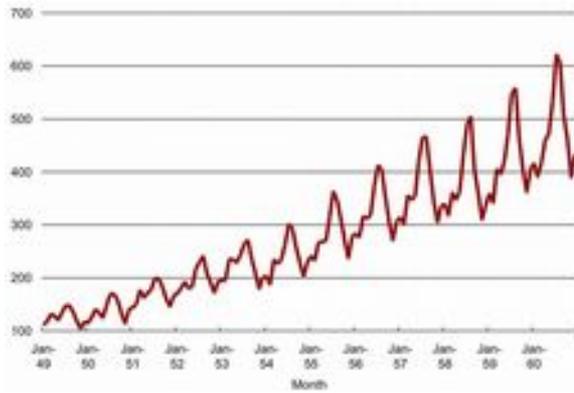

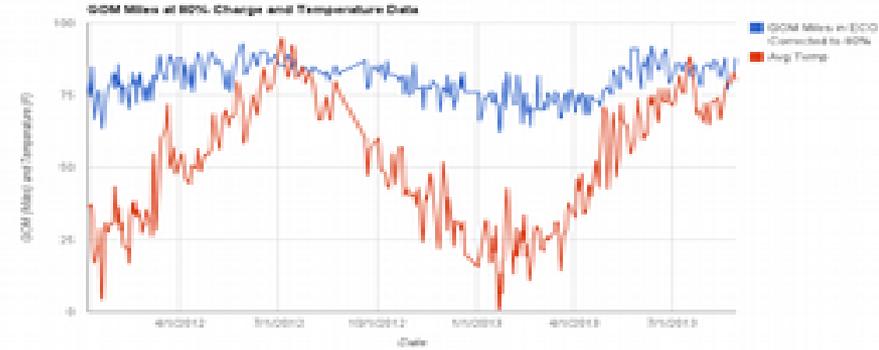

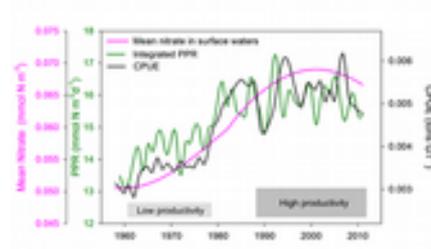

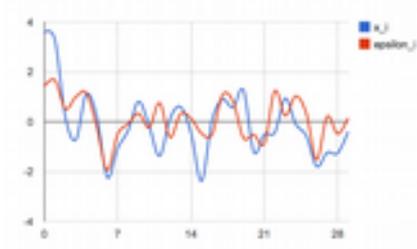

# Structuring Data

*Metadata / Ontologies provide the meaning of the data*  
→ link each data element to a **controlled, shared vocabulary and *Machine readable***

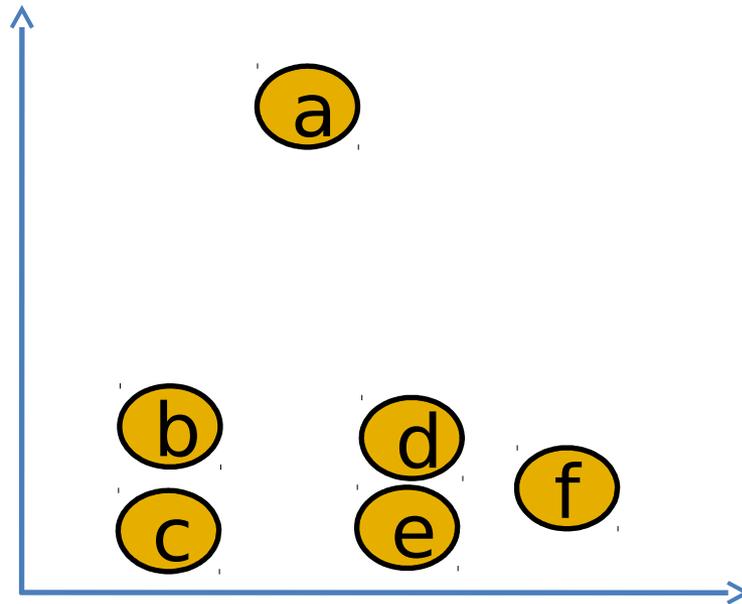

# Data analytics

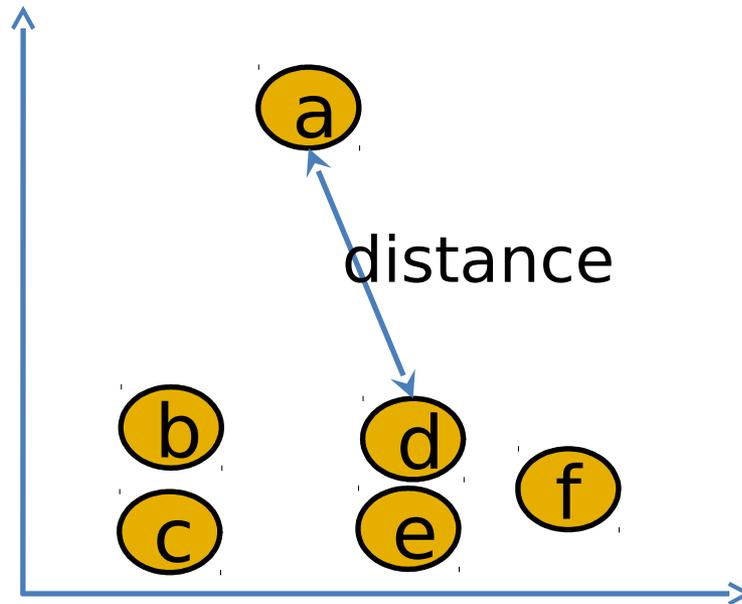

# Data analytics

## Clustering (segmentation)

# Data analytics

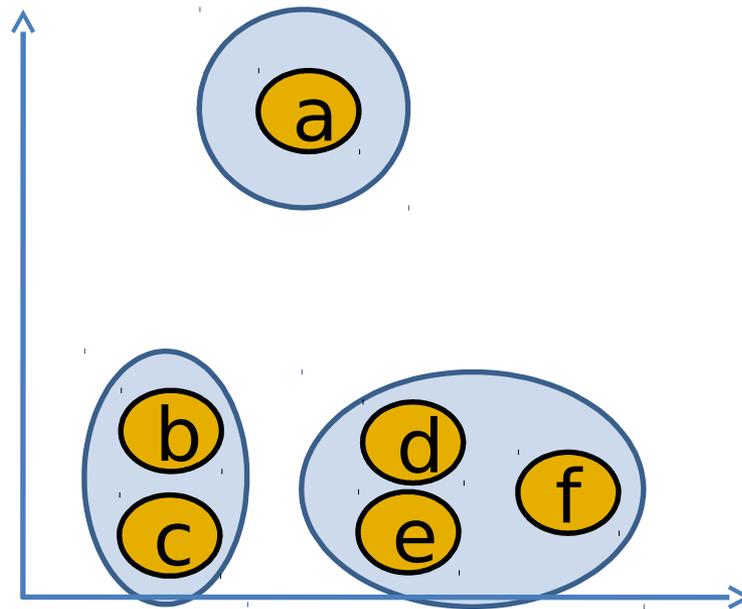

## Clustering (segmentation)

# Data analytics

## Clustering (segmentation)

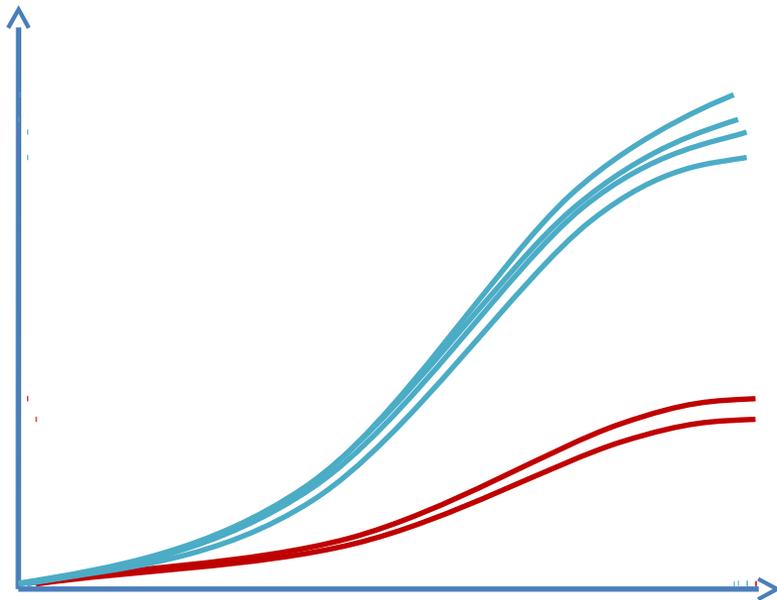

**Build groups**

# Data analytics

## Clustering (segmentation)

### Build groups

- Wine clusters
- Field clusters
- Etc.
- **Time series**

# Data analytics

## Discover Associations

Id	Bière	Chips	Marteau	Clou	...	Poisson
1	X	X				
2			X	X		
3		X				X
4	X	X				X

# Data analytics

## Discover Associations

**Bio-aggressor development, find associations:**

- Size of hedge
- Sort of of hedges
- Area humidity
- Type of fauna
- Land configuration
- Practices
- ...

# Data Science

**Search**

**Discover**

**Mine**

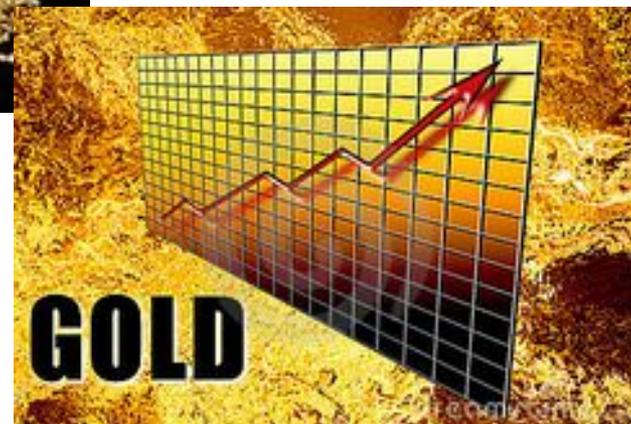

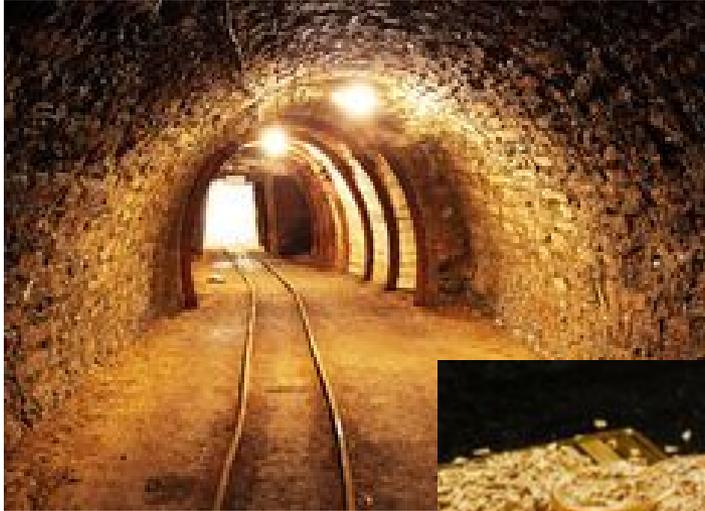

**Extract**

**Refine**

**Transform**

# Data Science

Video....

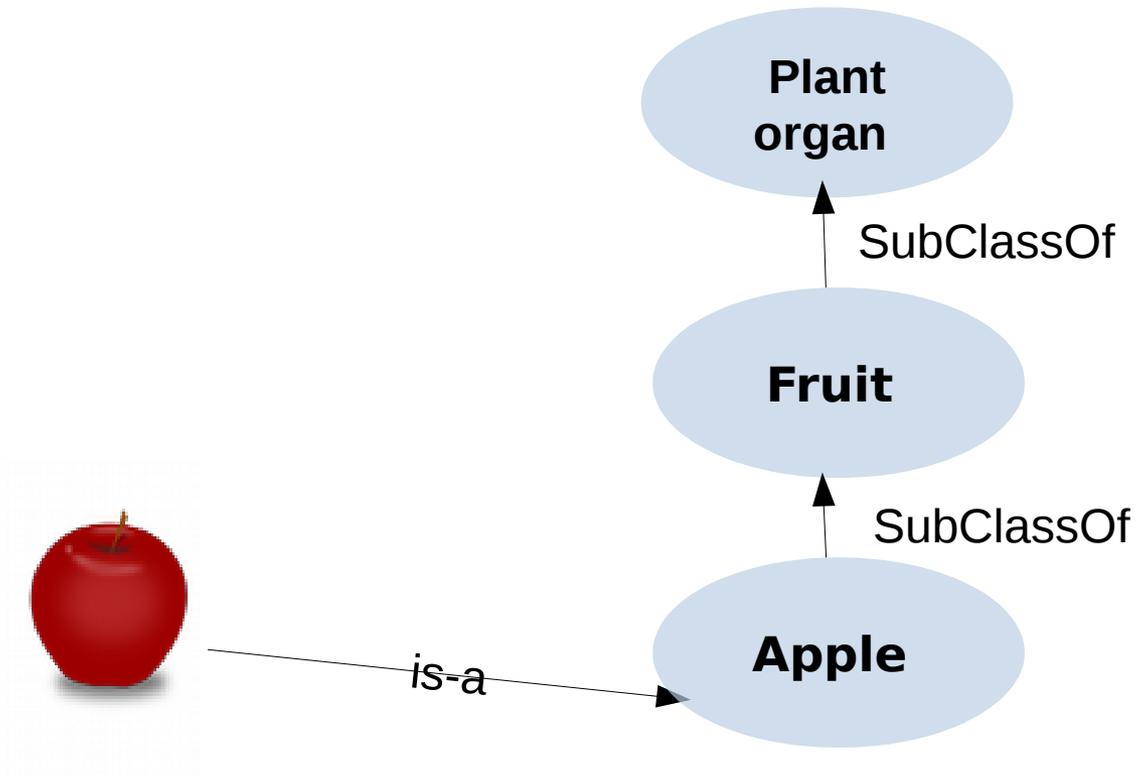

# Conclusion

- **Storage costs, new devices, Web... make Big Data**
- **Data must be group, integrate...**
- **Big data analytics open new insights**
- **Ethic and privacy needs**
- **New skill needs**
- **Big data is cultural and technical challenges**

# PHIS Example

*Ontologies provide inference*

# PHIS Example

*Ontologies provide inference*
